

CLUBHOUSE COMMUNITIES

A **CLUBHOUSE** is a unique, voluntary, member-driven psychosocial rehabilitation program for adults who experience the challenges of mental illness. Within a supportive environment, program participants (members) are offered a multitude of services to improve the quality of their lives through meaningful work, positive relationships, and gainful employment. Members can build on their strengths and abilities to acquire or improve skills needed to reach their individual goals and aspirations.

The Clubhouse approach to psychiatric rehabilitation began in 1948 with Fountain House in NYC. Fountain House has been replicated in over 30 countries and clubhouses aspire to follow the international clubhouse standards.

The Clubhouses in Hawaii are members of the International Center for Clubhouse Development (ICCD).
